

2-day Rangeland Monitoring School

Sept.24 & 25— Miles City, MT., on the Ogdahl Rocking O Outfit

Hands-on training for range managers ready to start a monitoring program that will help direct management decisions, improve animal performance & rangeland conditions.

General Description:

Participants will leave this NEW two-day course with well-practiced abilities in choosing monitoring sites, transect layout and EKG photo procedures. This class is designed for any rancher or conservation manager seeking a rapid, repeatable monitoring program, right away. The course begins with an introduction to land monitoring, forage production, and grazing management but spends the majority of time teaching participants the mechanics of setting up EKG transects, using EKG photo methods, and documenting site information.

Participants will leave with these materials:

- Part I - EKG Site Mechanics Field Guide
- Permanent Location Forms
- EZ-EKG pocket field cards for quick land assessment
- 4 month trial subscription to DataStore

Accommodations: Ogdahl Rocking O Outfit: "catered camping" with hearty meals and snacks provided. Teepees for sleeping, or bring your own tent. This will be a learning experience and outdoor setting you won't forget!!

Course begins, Sept. 24, 8:30am— registration with coffee & rolls. This day is all hands-on training. Management discussions at dinner and around the campfire. The second day continues with in-field practice, wrapping up at 4:30pm on Sept. 25

Investment for the entire package is \$475.

*More details will be provided following your registration!
Register by Sept. 18, 2009, limit of 30 people*
